Preview only visualizes one formula at once: if you insert or select several formulas, it will not work.

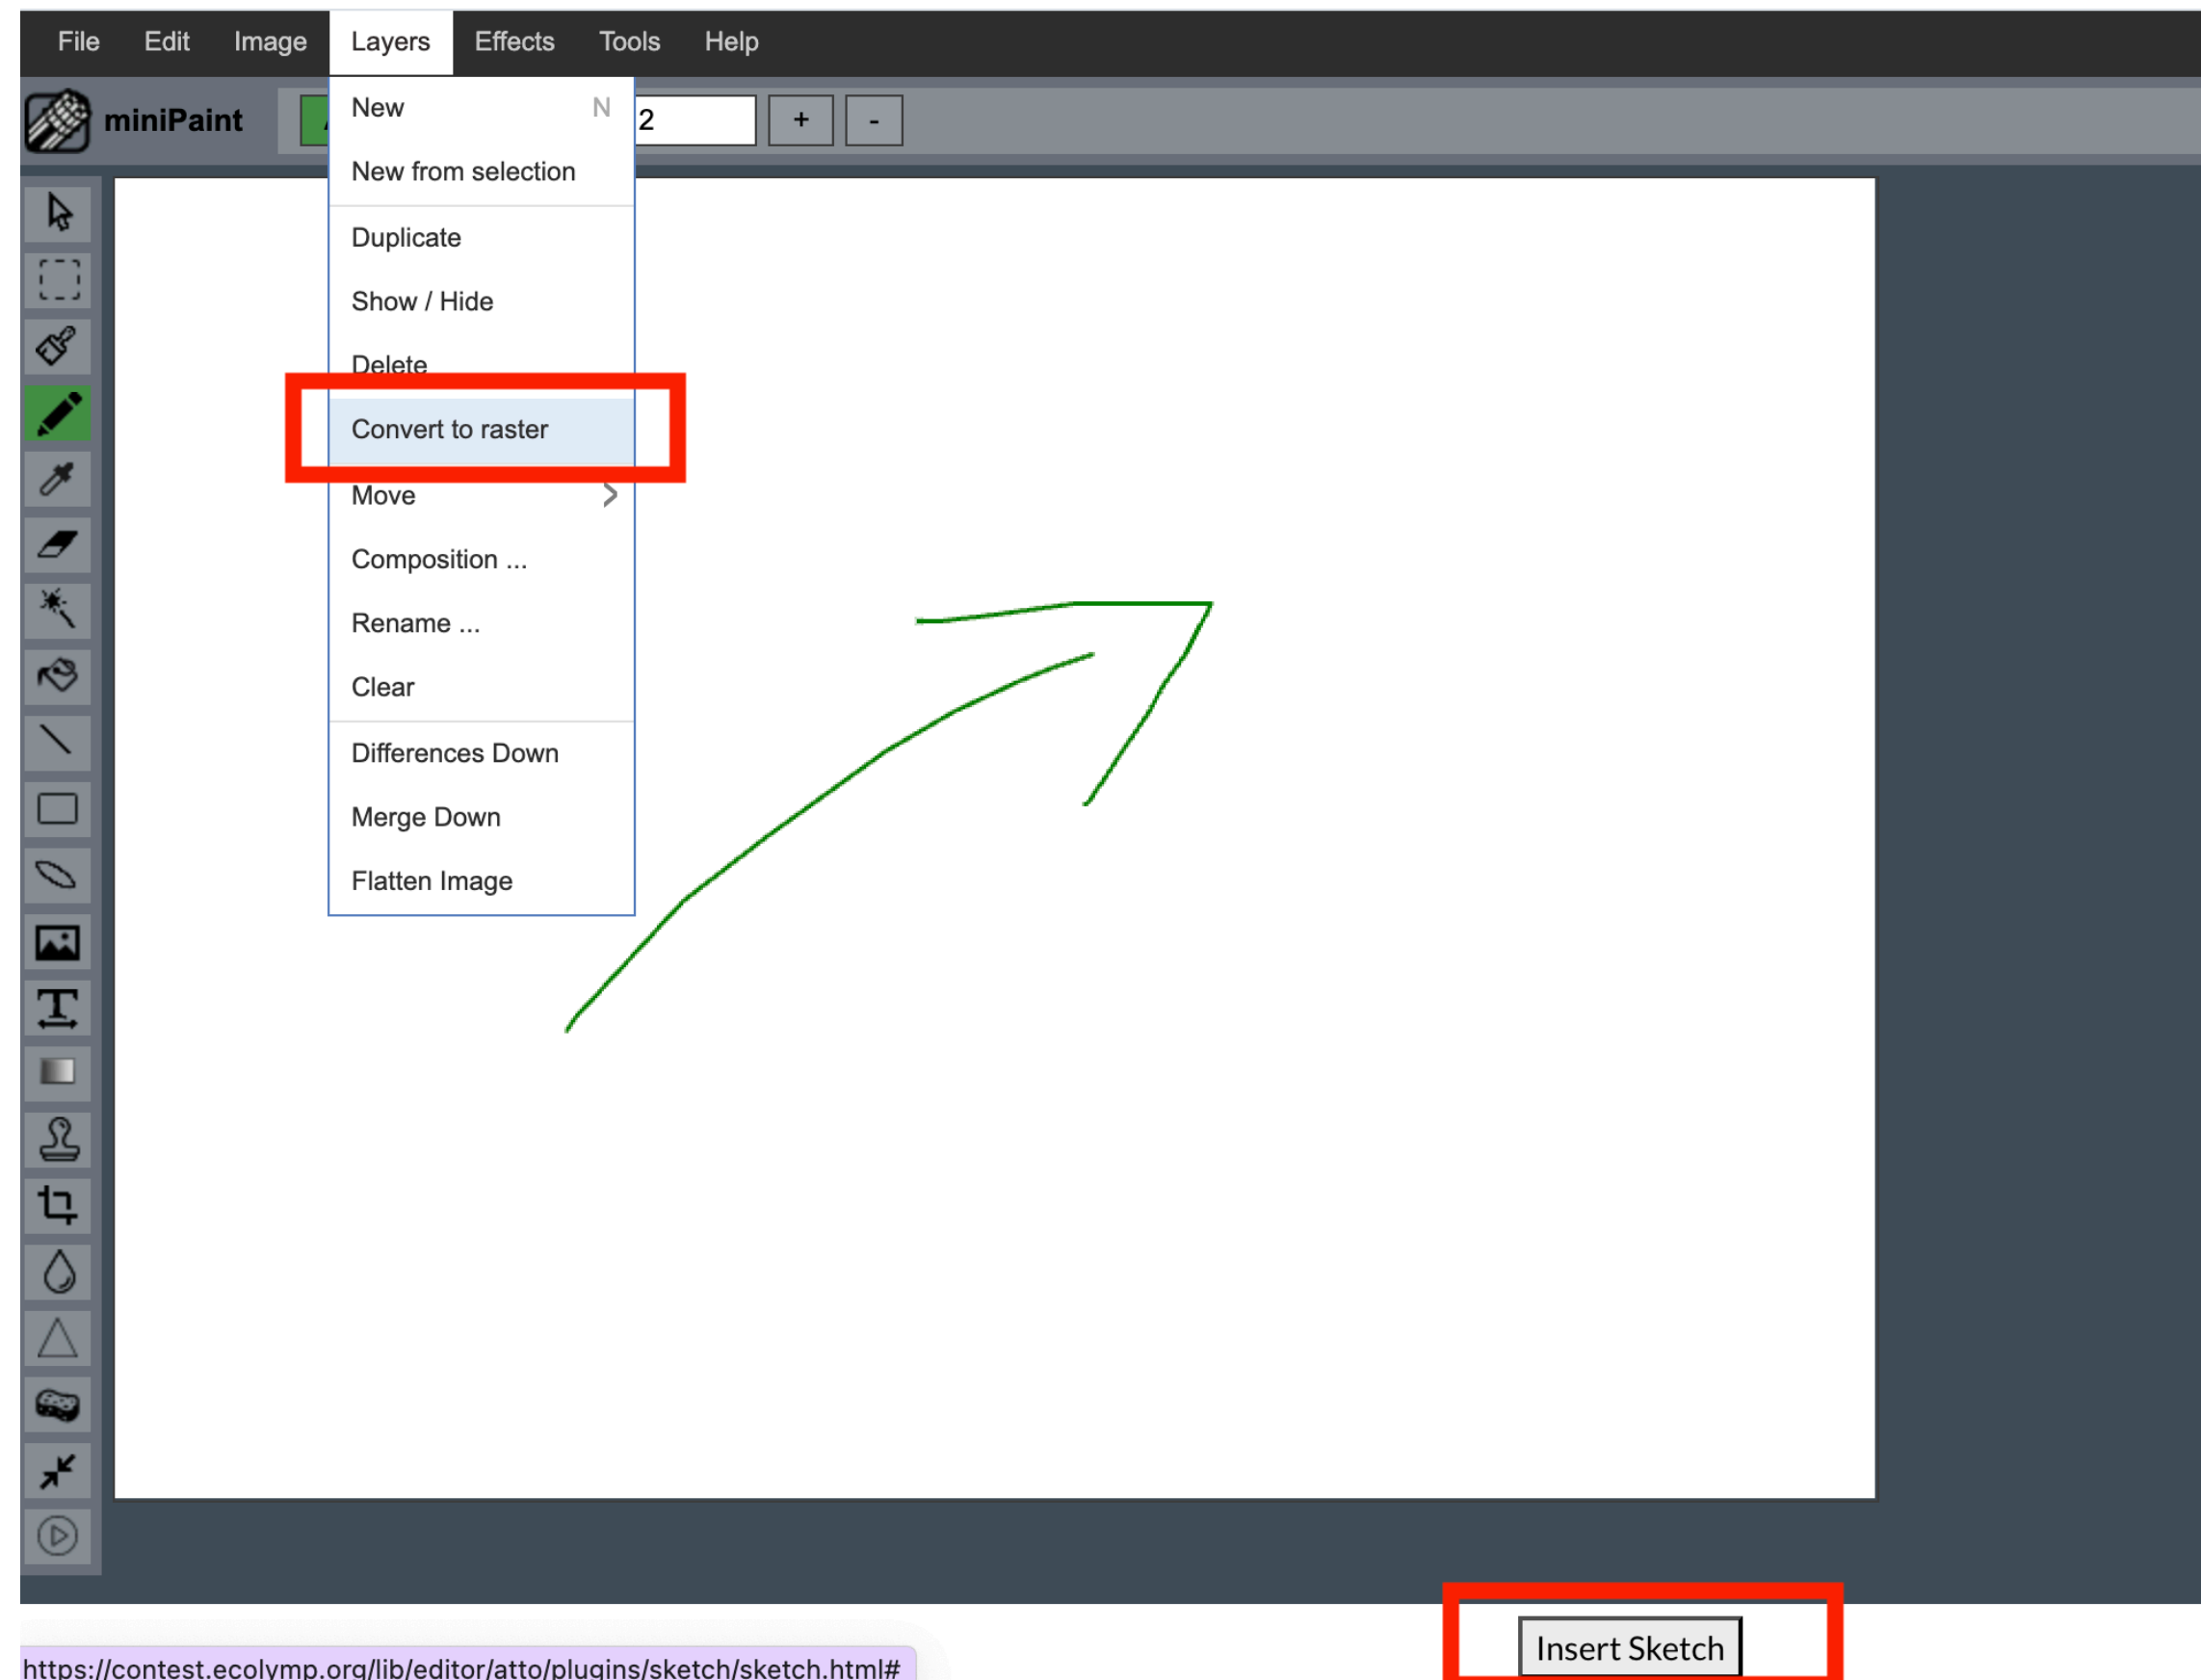

To preview the formula that you have already inserted and saved, select the formula and click on the plugin symbol again.

You are not obligated to create formulas with this plugin only: you can just type the formula on your keyboard as long as it looks understandable.

Sketches editor

Sketch and Save

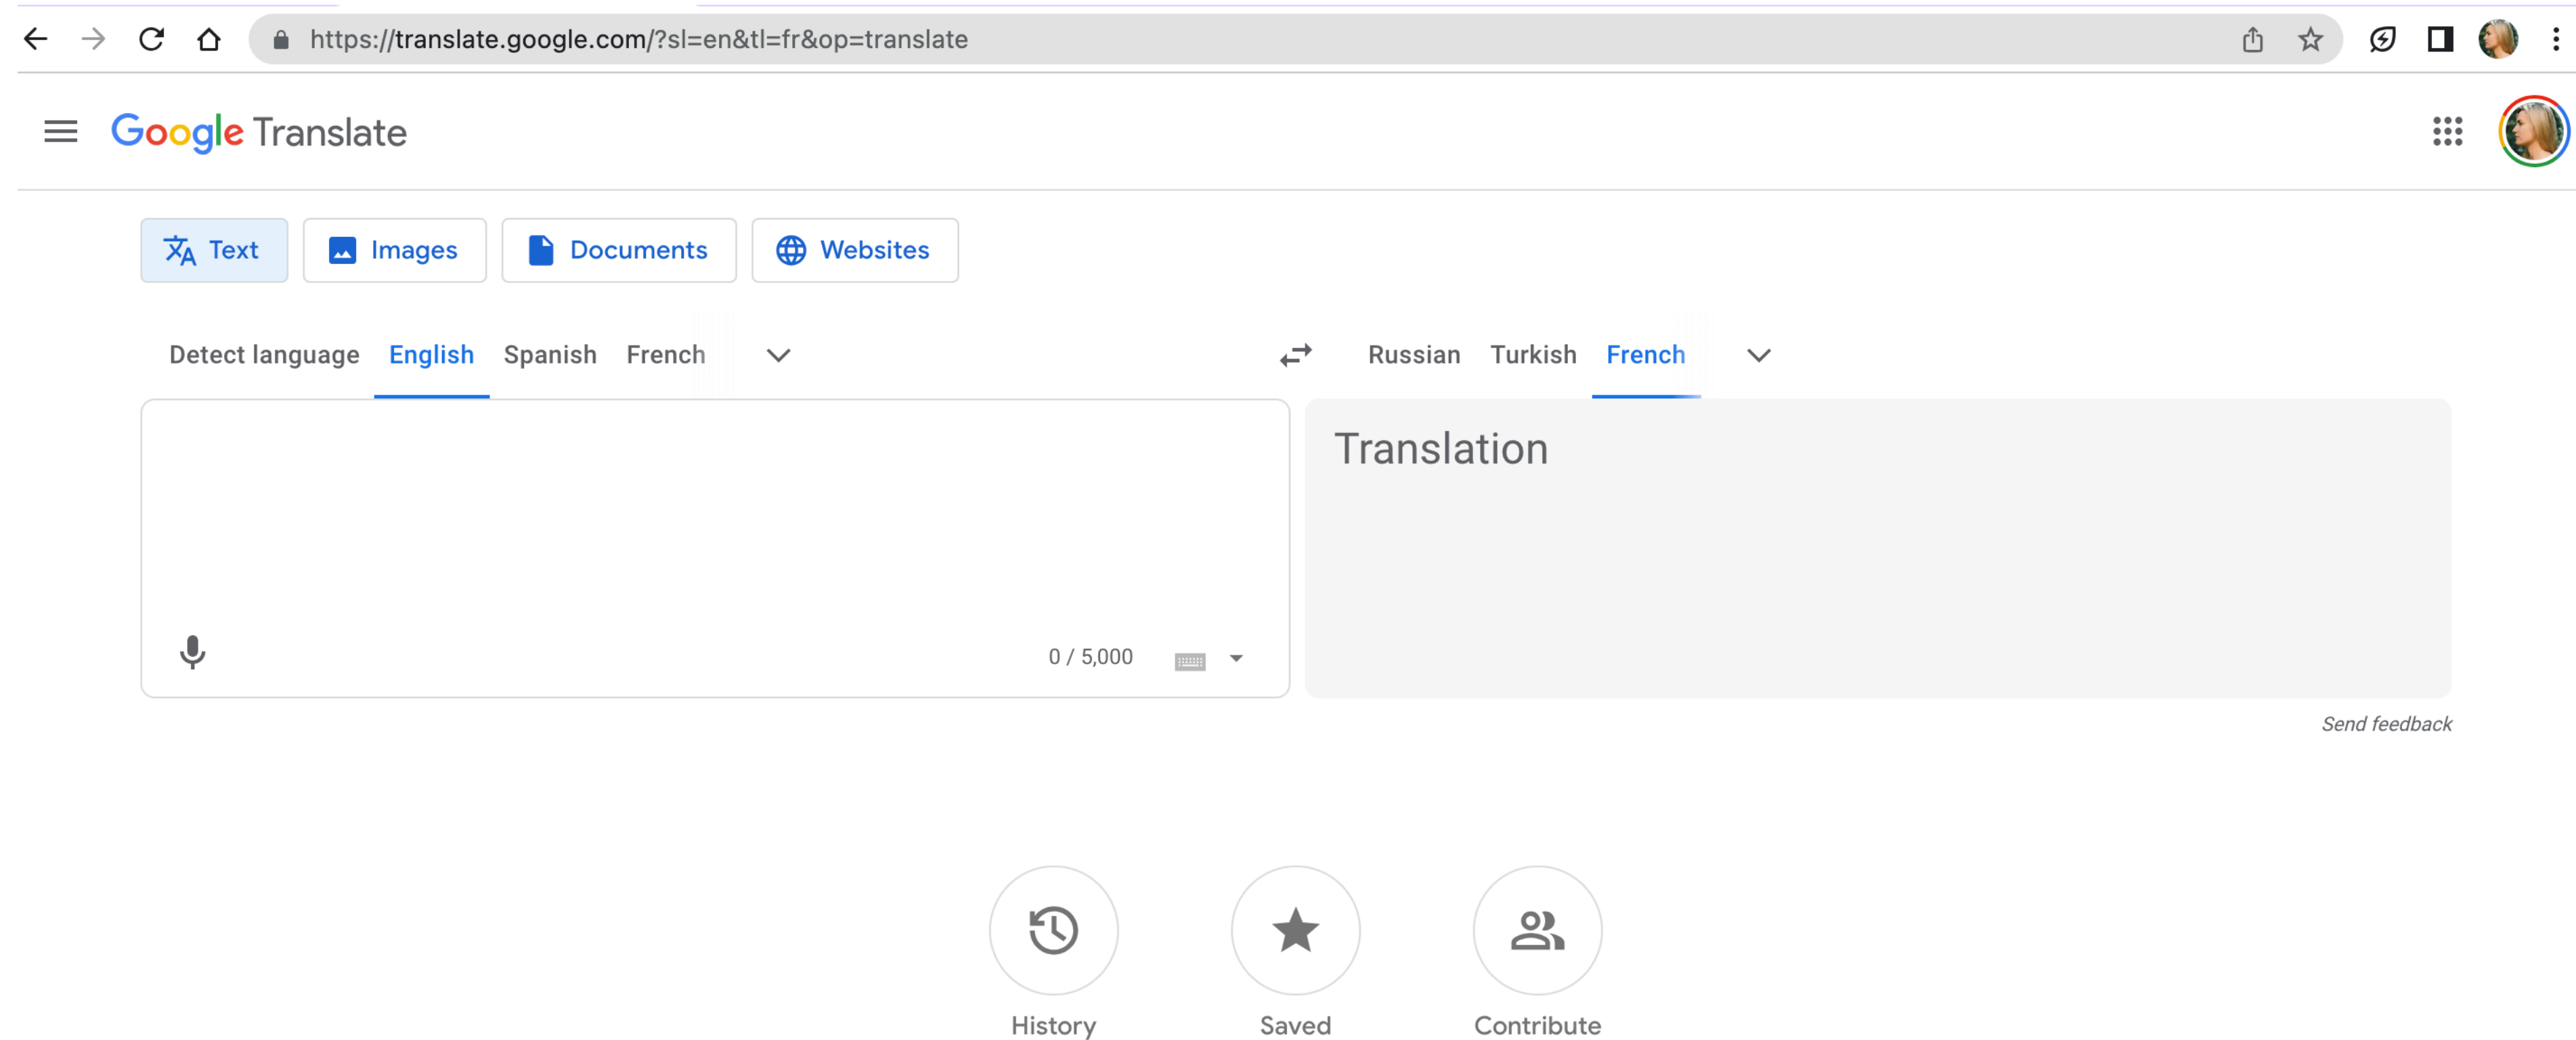

If you add lines and figures, don't forget to convert the layer to raster. To do so, go to **Layers** → **Convert to raster**. Without this conversion, you will not be able to save the sketch nor erase the parts that you want to disappear.

The "Insert Sketch" button is located **at the bottom of your screen**. To see it, hide the bottom banner connected to screensharing (use the "Hide" button).

translate.google.com

You can translate separate words, not phrases. To do so, use Google Translator in a separate web tab.
